

Y-VALVE

Y-valves

A universal valve to discharge either overboard or into waste tanks designed for long distance control by means of a push-pull cable. It can be used in three ways: 1) the water from the toilet is flushed into the sea or into the waste tank; 2) the water is discharged from the waste tank into the sea by means of a macerator or on the quay by means of a suction pump; 3) the macerator discharges into the sea or on the quay by means of a suction pump. Can be padlocked.

Equipped with extra 25 mm straight inlet port and handle extension.

Can be operated through bulkhead.

Orientable port connection 38 mm
