

Chest Refrigerators and Freezers - Convertible

# BI 41 Dual

Compact, versatile and customizable chest fridge or freezer for any space

Compact and versatile cooling solution, ideal for those looking for a product that combines high performance and ease of use. Equipped with a simple to use thermostat, it allows you to easily select refrigerator or freezer mode, with a temperature range from  $-22^{\circ}\text{C}$  to  $+13^{\circ}\text{C}$ , to satisfy every customer need. The fan-cooled, bottom-mounted compressor can be easily repositioned up to 0.9 meters away, offering greater installation flexibility. Alternative compressor options, such as SP or Magnum, are also available to suit different needs. The fridge/freezer is characterized by its compact dimensions, which make it perfect for environments with limited space. The upper frame and internal cabinet are made of high-quality materials, easy to clean, and equipped with a practical wire basket for convenient organization of food and drinks. The new control element is well integrated into the body of the furniture and easy to use, while the multiple installation options make it extremely versatile. With the BI 41, performance, practicality and design come together to offer a high-quality cooling solution, suitable for any environment.

## Technical features

Voltage (V)	12/24V	Height (mm)	612
Certifications	CE	Climate Class	ST
Energy consumption (Wh/24h)	222	Compressor	BD1.4F-AM
Refrigerant gas	R134a	Width (mm)	342
Net weight (kg)	14	Depth (mm)	500
Freezer temperature	* (-6)	Cooling technology	Compressore
Installation	Incasso	Freezer volume (L)	41
Fridge volume (L)	41	Total volume (L)	41
