Douglas Marine

Ladders with integrated handle
Scalette con maniglia integrata

New Douglas Marine S.r.l. - Via Guglielmo Marconi, 3
20042 Pessano Con Bornago (MI) - Italy

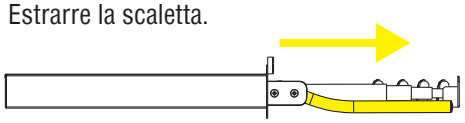

Our ladders with handles are equipped with an integrated locking mechanism that makes it easy to retrieve the ladder from the stern platform.

Le nostre scalette con maniglia sono dotate di un meccanismo di chiusura integrato che facilita il recupero della scaletta dalla spiaggetta di poppa.

OPENING LADDER
APERTURA SCALETTA

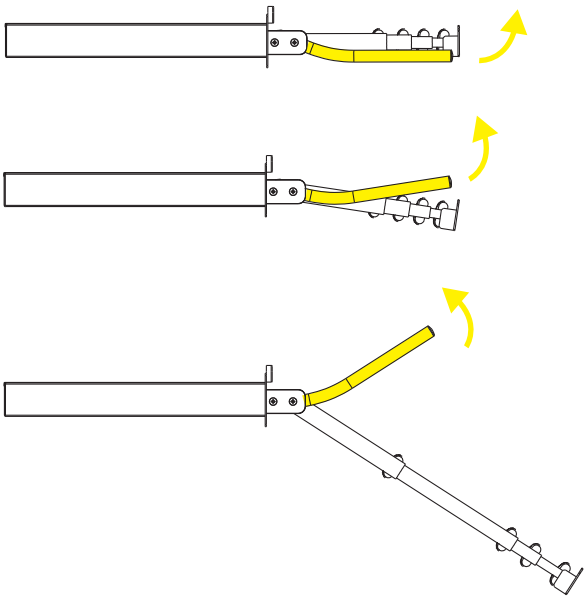

❶ Take out the ladder.

Estrarre la scaletta.

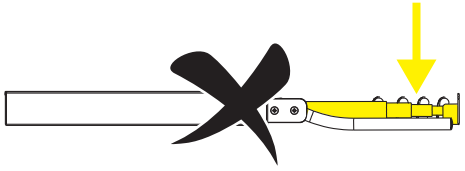

❷ Once fully extracted, use the handle to lower it.

Una volta estratta completamente, usare la maniglia per farla scendere.

❸ If you try to push the ladder down, it will not work. Use the handle.

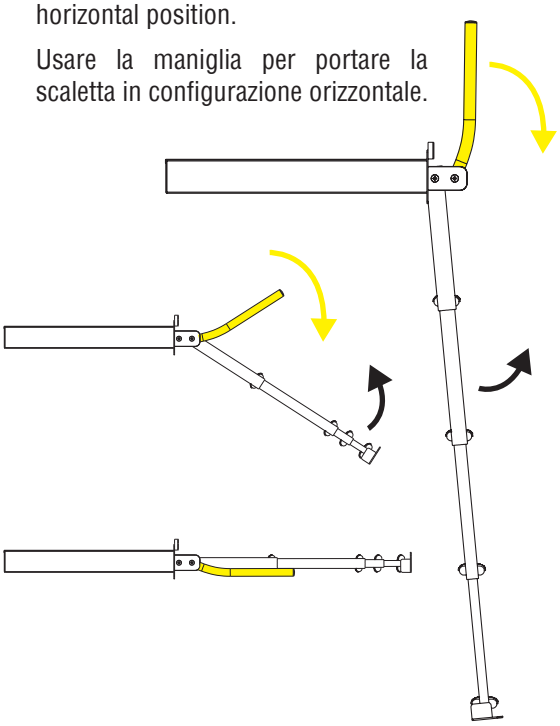

Se si prova a spingere la scaletta verso il basso non funziona. Utilizzare la maniglia.

LADDER CLOSURE
CHIUSURA SCALETTA

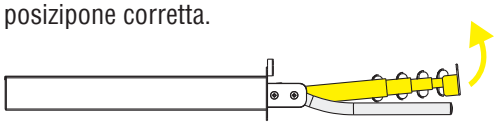

❶ Use the handle to carry the ladder in a horizontal position.

Usare la maniglia per portare la scaletta in configurazione orizzontale.

❷ Pull the ladder slightly upwards to ensure that the handles are in the correct position.

Tirare leggermente la scaletta verso l'alto per assicurarsi che le maniglie siano entrate in posizipone corretta.

❸ Push the ladder into the drawer and close it.

Spingere la scaletta all'interno del cassetto e chiuderla.
